

Connected Communities

Connected Communities Team

- Mayor Aftab Pureval
- Cincinnati City Council
- City of Cincinnati Planning & Engagement
- Neighborhood Community Councils
- Neighborhood Residents

An aerial photograph of Cincinnati, Ohio, featuring the Roebling Bridge in the foreground, the city skyline in the middle ground, and the Ohio River in the background. The bridge is a blue steel truss bridge crossing the river. The skyline includes various skyscrapers and buildings, with the Cincinnati City Hall being a prominent feature. The river is a wide, calm body of water.

Meeting Agenda

1. Introduction
2. What is your “Housing Narrative?”
3. “Sim Cincy”
4. Housing Variety
5. Development Requirements
6. Parking Requirements
7. Next Steps

Rules of Engagement

- This is a safe place for exploration. Challenge yourself to have new ideas.
- Step up / Step back.
- Consider your neighbor's background and perspective.
- Be respectful and help build conversations.
 - Say "Yes, and..." or "What if...?"
- Our time together is valuable.
 - Please remain on "Mute" throughout the presentation.
 - If you have a question or comment, raise it with your Small Group.

What is Connected Communities?

A series of potential policy changes related to how land is developed

Why Connected Communities?

- To help Cincinnati become more people-focused, healthy, and connected.
- To support growth and investment in our community.
- To accommodate an increasing population and maintain City services.

Why are we here?

- Every neighborhood is different.
- You know your neighborhood the best.
- We want to hear your input.

Breakout Session

1. Icebreaker: What is your Housing Narrative?
2. Simcinnati: The Connected Communities Engagement Game

What is your housing narrative?

1. There are many kinds of housing.

2. We all have different housing needs at different points in our lives.

3. Discussion: **What is your housing narrative?**

Simcinnati

The Connected Communities
Engagement Game

The Game:

Help your neighborhood grow!

Provide housing for new residents.

Create a neighborhood you're happy with.

The Game:

The Game:

New Customers support New Business

Critical Mass:

- The number of customers needed for a development to be successful.*

20 Households

Street Trees

Bike Lanes

Grocery

Grocery Store (With Parking)

New Customers support New Business

Critical Mass:

- The number of customers needed for a development to be successful.*

50 Households

Brewery

Restaurant

New Bus Route

New Customers support New Business

Critical Mass:

- The number of customers needed for a development to be successful.*

100 Households

Ice Cream

Public Park

Grocery

Parking not needed

Must also add:

School

Parking Garage
(If no bus line)

Why are we playing?

- Frame tonight's conversations about complex issues:
 - Population increase
 - Housing
 - Transportation
- Hear our neighbors' perspectives

The Timeline:

5 Minutes

What is your Housing Narrative?

20 Minutes

Simcinnati

Choose your personal homes

- (Add initials on a board square)

Reach 20 households.

- Add amenities

Reach 50 (or 100) households

- Add amenities

10 Minutes

Discussion

Have fun!

What is Zoning?

Laws that govern how property can and cannot be used.

4 Basic Use Categories:

Residential

Commercial

Manufacturing

Public

Goal: Similar uses are close together.
Different uses are separated from one another.

What is Zoning?

Goal

Not Enough Zoning

Too Much Zoning

What is Zoning?

Goal

Not Enough Zoning

Too Much Zoning

Current Trends

1. More people want to live in/around Cincinnati

Population increases, 2010-2022:

City of Cincinnati: **13,000 more people**

Metro area: 120,000 more people

2. Housing costs are increasing.

Annual rent increase: 5.6%

House price increase: 4.4%

3. Supply & Demand

Increasing population = Increasing demand for housing

Current need for:

15,250 for-sale homes

10,150 rental units

Cincinnati average rent costs, 2023

1. Macrotrends.net

3. 2022 HUD Comprehensive Housing Market Analysis for OH-KY-IN

Current Trends

Many residential zoning districts only allow single-family homes.

Large multi-family buildings are more cost-effective to develop

- Lower construction costs per unit
- Easier to manage multiple units on the same property

Difficult to build “Middle Housing”

Public Survey Results

1,256 responses – Thank you!
February, 2023

Positive support for increasing population city-wide

- 70% want to increase population city-wide

Less support for more housing “in my neighborhood.”

- 35% want more housing “in my neighborhood.”

Public Survey Results

Most popular options for new development:

- Small-scale mixed-use buildings (66%)
 - Small apartment or condo building (64%)
-

Least popular options:

- Single-Family Homes (45%)
- Large condo or apartment building (47%)

Public Survey Results

Most popular options for new development:

- Small-scale mixed-use buildings (66%)
- Small apartment or condo building (64%)

How can we encourage this development?

Where can we encourage this development?

Special Considerations

Neighborhood Business Districts

- Residents are closer to jobs, food, and services.
- Businesses have more customers within walking distance

Transit Corridors

- Residents have access to jobs City-wide
- Businesses have more customers walking past them.

Connecting with Other Communities

What are other cities doing?

“Allow 2, 3, and 4 family homes close to transit lines”

-Montgomery Co, MD

“Allow corner lots in 1-family neighborhoods to have more units.”

-Denver, CO

“Allow 2 and 3 family homes in all residential zones.”

“Allow Accessory Dwelling Units” (Tiny homes in rear yards)

-Charlotte, NC

“Allow 2-family homes in nearly all residential districts.”

-Raleigh, NC

Single-Family Residential District

“Allow 2, 3, and 4 family homes close to transit lines”

What could these changes look like?

TRIPLEX

FOURPLEX

What is it?

Allowing small-scale multi-family, like 2-family, 3-family, and 4-family housing, in places where only Single-Family housing is allowed currently.

Why might we want it?

Increases affordability, economic and racial diversity, & lowers greenhouse gas emissions

What cities have allowed these?

Minneapolis, MN: 2- & 3-family in SF

Charlotte, NC: 2- & 3-family allowed City-wide

Raleigh, NC: 2- family in SF, except largest lots, townhomes less restricted

Bend, OR: 2 & 3-family allowed City-wide + removed density regulations for Middle Housing

Portland, OR: up to 4-family on highest density residential lots + 6-family allowed if two affordable units

Policy Discussion: Housing

Reduce Regulatory Barriers

Development Regulations

Factors currently governed by Zoning:

Setback

Minimum distance from property lines

Height

Maximum distance from ground to top of building

Density

Maximum number of housing units per property

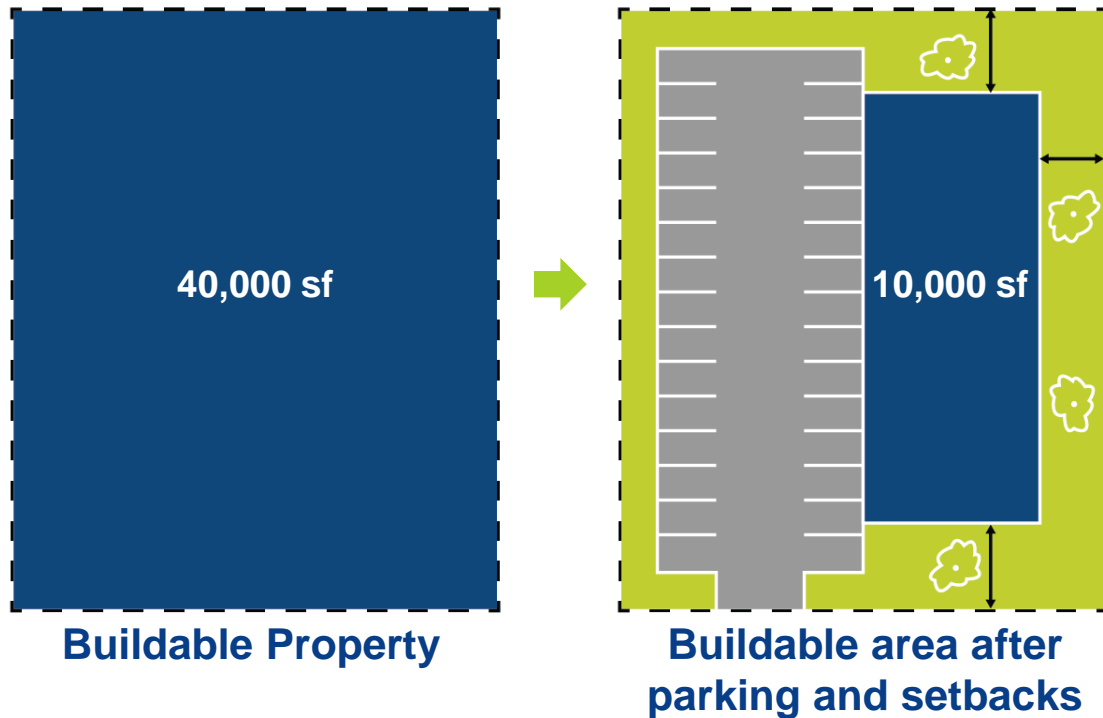

Parking

Minimum number of spaces required

Development Regulations

Positive Impacts:

- Prevents overcrowding.
- Preserves natural green space.
- Protects views of landscape.
- Prevents shortages of parking.

Negative Impacts:

- Limits housing availability.
- Increases per-unit housing cost.
- Prevents land from being used to maximum potential.

Connecting with Other Communities

What are other cities doing?

“Allow higher density, larger buildings, reduced parking City-wide.”

-Chicago, IL

“Allow higher density near transit and growth corridors.”

-Montgomery County, MD

“Allow higher density in all districts, greatest increase near transit corridors”

-Raleigh, NC

“Allow higher density, larger buildings near neighborhood centers.”

-Seattle, WA

Evolving Perceptions on Parking

Parking in Commercial Districts

1920s. No parking required. Cars parked on street, sidewalk.

1960s. "Free Parking for over 3,000 cars!"

Parking in Commercial Districts

Pleasant Ridge. Historic business district. Pedestrian-oriented.

Easy

Difficult

Ridge Ave. New Commercial District. Automobile-oriented.

Difficult

Easy

Parking Required by Zoning Code

Single-Family Home

2 Spaces

Hospital

1 Space per Bed

Restaurant

1 Space per 150 sq ft

Marina

1 Space per 2 Docks

Exception: Urban Parking Overlays (Downtown)

Tony's Barber Shop

OPEN

4 Apartments = 4 Parking Spaces

2,000 sq. feet = 8 Parking Spaces

Use Classification	Minimum Number of Parking Spaces Required
Barber Shop	1 per 250 square feet
Apartments	1 per Apartment

4 Apartments = 4 Parking Spaces

2,000 sq. feet = 8 Parking Spaces

Use Classification	Minimum Number of Parking Spaces Required
Barber Shop	1 per 250 square feet
Apartments	1 per Apartment

Apartments	1 per Apartment

Parking Minimums in Neighborhood Business Districts

	Historic Block	Block with Parking
Buildings	5	1
Businesses	7	2
Apartments	10	4
Parking Spaces	Few	24

Parking Minimums in Neighborhood Business Districts

Not Enough Parking

Not Enough Buildings

Where's the balance?

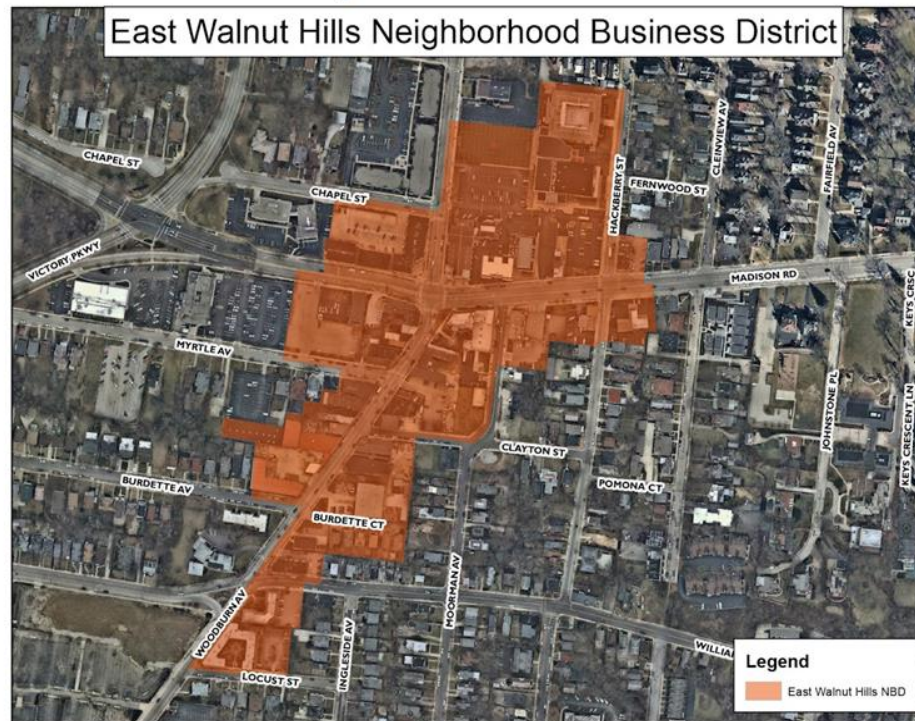

Current options to navigate parking requirements:

- Some districts offer relief for small buildings or shared parking lots
- Historic non-conforming uses can be “grandfathered-in”
- Request a variance of these requirements
- Consider a different location that already offers parking
